Professional colour laser printer

High-quality, cost-effective professional colour printing with premium results. Built for business, this device is designed to deliver a professional performance - with high-speed, glossy colour printing you can rely on with the flexibility to be tailored to suit you and your business

HL-L9430CDN

Key features:

- Print up to 40 pages per minute
- 2-sided print, up to 28 sides per minute
- 8.76cm colour touchscreen LCD
- NFC (Near-Field Communication) for secure authentication and mobile print
- 1GB internal memory
- 520 sheet paper input tray expandable to 2600
- 9000 page (BK), 6500 page (C/M/Y) inbox toners[1]

Simple. Effortless. Intelligent

The HL-L9430CDN comes with Cloud Secure Print as standard, so you can print securely without installing additional drivers or apps. You also have the option to further enhance your device with third party solutions, meaning that you can have a fully integrated print, capture and output management solution all from one provider.

Flexibility that saves money

A wide range of professional finishing options are available for the HL-L9430CDN for optimal efficiency. If you need a mailbox to sort your printed documents, your printer can easily be transformed to help improve business productivity. Boost paper capacity with additional paper trays or Tower tray unit, transforming your HL-L9430CDN to a floor-standing printer.

Secure by design

As working conditions change, security is more critical than ever. The HL-L9430CDN comes with enterprise level security, supporting the latest industry-standard security protocols to keep your data secure. You can further protect your device by setting up user authentication, whereby access to certain settings and functions are restricted to authorised users or groups.

When quality and performance work together

Our most advanced colour printing technology is guaranteed to make the right impression when it counts, with vibrant, professional colour prints. The robust design and long-life components provide confidence that your device will keep on performing without interruption.

Solutions ready

Streamlined business processes

With the ever changing workplace, it's important to continuously review and refine the way your business operates. Utilising the right technology can redefine business processes and bring surprising benefits.

Cloud Secure Print is a convenient built-in feature which enables you to easily send documents to print when you're away from home or the office. Remotely submit the print request via email to a Brother device with an active internet connection and securely retrieve print jobs when you are ready. Documents will only be printed when the sender enters a unique password on the destination device's control panel.

Unlock new possibilities with a range of business solutions

Whether you already use print management software or would like to understand how it can improve efficiency and security within your business, we are here to help.

You have the option to upgrade your device with intelligent Brother and third-party solutions, including integration with industry leading providers Kofax, and YSoft. This gives you complete flexibility in how you manage, secure and control your documents.

We work closely with our software partners across print management and document capture to create tailored solutions for your specific requirements. When we partner with a software vendor, we ensure your HL-L9430CDN works even harder to meet your needs.

Security Features

E-mail Notifications
Automatically have the device send e-mail alerts when it requires attention, such as when the toner is low or needs replacing

E-mail Reports
Receive usage reports on a regular basis via e-mail

Automatic Intrusion Detection
All Brother Print devices are secure by design. Devices automatically recognise security attacks and take preventative measures, including rebooting where necessary, in order to ensure the device remains secure.

Digitally-signed Firmware
The firmware for Brother Print devices is digitally signed and secure

On-Premise Active Directory/LDAP Authentication
Utilise existing infrastructure to restrict access to Brother devices using AD/LDAP. Staff can easily use their existing network login credentials to authenticate

Port-based Network Access Control
(IEEE 802.1x)
Brother devices are in full compliance with this standard, to allow connection to an 802.1x EAP (Extensible Authentication Protocol) protected network

Restrict network protocols
The Protocol Control feature allows an administrator to restrict communication protocols (e.g. FTP, Telnet) as required

Setting Lock
Secures access to the devices control panel by locking it

Secure Function Lock 3.0
Use a 4 digit pin or a password to identify and authenticate an individual or groups of users over a network. Allows access control with username for up to 200 users

Cloud Secure Print[10]
Enables password protected driverless print job release

Store Print Log
Allows the audit of a print log file saved to CIFS server. Record ID, type, name, user, date, time, page count for every print job

Firmware Updates
In addition to allowing automatic updates to the latest version the printer can be set to not receive older firmware versions to avoid downgrade by unauthorised user

SysLog
Allows IT Admin to access a single application (SIEM tool) to get device status updates for audit purposes over Syslog

Near-Field Communications (NFC) / Card Reader Support

Integrated NFC Reader
